About Me

I am a full-stack developer. My extensive engineering background has given me the ability to simplify complex problems, attention to detail, organization and team management skills. I have a keen interest in coding due to my interest in problem solving. As someone who has embraced lifelong learning, I focus on constantly staying up to date and improving myself. I continue to learn and specialize in new technologies with great enthusiasm. I am looking for opportunities where I can contribute to innovative software solutions using my technical skills.

English: Upper Intermediate, **Turkish:** Native

Skills

Proficient: *JavaScript | React.js | TailwindCSS | Node.js | Express | MongoDB | Redux | C# | .NET | .NET Core | .NET MVC | MsSQL | Postman | ShadCN | Bootstrap | JWT | Git | GitHub*

Familiar: *Next.js | Python | React Native | Expo Go | TypeScript | Mongoose | NextAuth | Firebase | Linux | Zod | React-hook-form | Zustand | Figma*

Education

Silicanmade Academy Bootcamp Mobile Application Development & Frontend Development (11.05.2024 - Expected 24.11.2024) Backend Development (04.11.2023 - 10.03.2024) Fundamentals of Programming (21.08.2023 - 11.10.2023)	2023 - Present
Anadolu University Computer Programming / Open Education	2023 - Present
Sakarya University Business Administration / Master's Degree	2013 - 2015
Suleyman Demirel University Civil Engineering / Bachelor's Degree	2005 - 2009

Projects

- **Movie App MERN:** This project is a Movie Streaming Platform built using the MERN Stack. It mimics the core functionalities of popular video streaming platforms, allowing users to sign up, log in, view trending movies and TV shows, watch trailers, search for actors and movies, and keep a search history. All functionalities are authenticated using JWT (JSON Web Token) (*MongoDB, Express.js, React.js, Node.js, TailwindCSS, React Router, Axios, Lucide React, Zustand, React Player, React Hot Toast, Mongoose, Bcrypt.js, JWT, Cookie Parser*)
- **Hotel Management Application:** In this project, where I used MsSQL as the database, the backend part was completely coded with API. In the frontend part, the API structure was consumed with MVC Controller. The Default panel of the project contains information such as catalog, contact, reservation, about us, and the hotel application is managed with the Admin panel. (*C#, .NET Core API, .NET MVC, Entity Framework Core, .NET Identity, Swagger, Fluent Validation, AutoMapper, JWT, Bootstrap, RapidAPI*)

Certificates

Backend Software Development Training, Siliconmade Academy	10.07.2024
Foundational C# with Microsoft, freeCodeCamp	06.04.2024
C# Projects: Learn C# by Developing Applications, Yazilim Teknolojileri Akademisi, Udemy	02.04.2024
OOP Basic with C#: Step-by-Step Layered Architecture, Murat Yücedağ, Udemy	09.03.2024
Fundamentals of Programming Certificate of Achievement, Siliconmade Academy	11.10.2023
